REELPOWER INDUSTRIAL

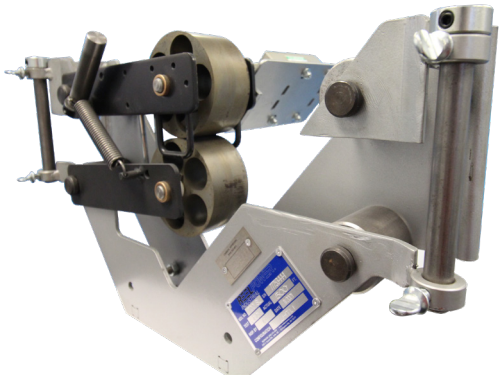

Recalibration Service

for Extending Product Life and Accuracy

Reel Power provides a recalibration service for some of the measurers. This service is subject to a standard evaluation fee and repair costs. Reel Power wants to keep you from giving away cable or providing “short runs” to your customers.

Reel Power recommends recalibration as follows:

1. Light to Moderate Cutting – *Annually*
2. Moderate to Heavy Cutting – *Semi Annually*

A flat evaluation fee of $275.00 is charged by Reel Power for the recalibration inspection of your unit. Parts, labor and freight charges will be added to that fee and you will be invoiced when the recalibrated unit is returned to you.

LOANER PROGRAM:

ReelPower offers a Loaner Program, based on availability, to use during recalibration. You are responsible for the Inbound and Outbound freight costs for shipment of the loaner.

TEST CABLES:

ReelPower offers Certified Calibration Test Cables in various lengths for in-field calibration testing. If measurement accuracy is out of tolerance, contact customer service.

Contact ReelPower customer service to request an RMA.

Call Customer Service:
(405) 672-0000

Upon receipt of your RMA, please send your measurer to be recalibrated and serviced to:

Reel Power
5101 S. Council Rd. Suite 100
Oklahoma City, OK 73179.
